Individualized rehabilitation for the hearing and visually impaired

JIVA- AINEET

Versatile Rehabilitation Services

The Finnish Deafblind Association offers versatile expert rehabilitation at its Resource Center in Tampere. We communicate and work in Finnish and Finnish sign language.

For whom?

Our rehabilitation services are for children, young people and adults with hearing and vision impairment or sensory and communication difficulties related to multiple disabilities.

We also provide rehabilitation for adults with hearing impairment.

In which case?

You can apply for rehabilitation if you have been diagnosed with a hearing impairment, with a combined hearing and vision impairment or if there has been a challenging change in your everyday life.

The rehabilitation is always adapted and planned individually. It aims to strengthen your resources and to support your skills to boost your activity and your daily life. Our rehablitation always strives toward your individual goal and is carried out together in good communication and using our expertise in sensory impairments.

Where?

An individually scheduled rehabilitation period is carried out at the Resource Center for the Deafblind in Hervanta, suburbian Tampere, with good transport and other services nearby. The accessible and functional premises and our sensory garden will guarantee you a pleasant rehabilitation stay all year round.

How to apply?

For rehabilitation you will need a rehabilitation plan and/or a doctor's statement. File the application with Kela using form *KU 104 Vaativa lääkinnällinen kuntoutus* (Intensive medical rehabilitation) or *KU 132 Harkinnanvarainen kuntoutus* (Discretionary Rehabilitation). KU 132 is unfortunately available in Finnish only.

Ask for help from hospital rehabilitation counsellors or from your own service specialists at the Finnish Deafblind Association. Once Kela´s rehabilitation decision has arrived, we can together with you and your family start planning and scheduling your rehabilitation.

Rehabilitation services are free of charge. You might also be entitled to partial reimbursement for travel expenses or a rehabilitation allowance.
